EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Morton Rosenberg on March 15, 2005.

The application has been amended as follows:

In the Specification:

On page 2 line 22, delete the word "with".

In the Claims:

In claim 1, line 24 delete the word "with".

In claim 2, line 2, delete the word "like".

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art has failed to suggest either singly or in combination a novel reclining chair. The applicant has disclosed the use of an adjusting mechanism for adjusting a back and footrest concurrently comprising a rotary shaft supported with a rear transverse rod of a support frame; whereby a pedal is securely joined to one end of the rotary shaft and a pushing member securely joined to another end of the rotary shaft. A locking rod for holding the back in position is pivoted to the transverse support rod of the back at an upper end thereof; whereby the locking rod is right

opposite a front side of the pushing member at a lower end thereof. The locking rod being formed with a plurality of spaced engaging gaps on a rear edge thereof for selective engagement with an engaging pin and thereby allowing the back to be angularly displaced relative to the seat when the pedal is depressed for making the pushing member push forwards such that the locking rod is disengaged the from the engaging pin. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Nos. 5,547,256, 5,342,114, 3,980,335, and 3,331,407 show features of the claimed invention.
